

InnoLoft wants you!

Linking corporates, combine technologies, create innovation!

Front-End Developer (m/f, full-time)

About InnoLoft

InnoLoft has set itself the goal of accelerating innovation in the tech sectors of energy, mobility, Smart City, Industry 4.0, IT/IKT, FinTech and Health. To do so, we operate a digital ecosystem. This shows established companies options for business development and matches them automatically with solution providers such as start-ups. In addition to the platform, as project managers with our Business Model Development concept we implement novel business models ready for sale to our customers (large corporations, hidden champions, medium-sized companies).

Why we need you

We've grown. Functionalities and possibilities of our platform are increasing. For the development of new functions and further whitelabel platforms we are looking for reinforcement in the area of front-end development as soon as possible. Are you looking for a big vision, a challenging task, a motivated team and flexible working hours? **Get in touch!**
